SUMMARY

Flutter Developer and Mobile Application Developer with 1 year of hands-on experience building 5+ personal and training Flutter mobile apps, tested on Android. Experience with BLoC/Cubit state management, REST API integration (Dio), Repository Pattern, data models, Firebase Authentication, Cloud Firestore, Hive/SQLite persistence, and feature-based architecture. NTI-certified in UI/UX Design with experience implementing Figma designs in Flutter. B.Sc. student in Business Information Systems. Open to Flutter Developer, Flutter Mobile Developer, and Mobile App Developer roles, including internships and full-time positions.

TECHNICAL SKILLS

- **Languages:** Dart, C++, Python, SQL
- **Mobile Development:** Flutter, Material Design, Responsive UI, GoRouter, EasyLocalization (Arabic/English RTL), fl_chart
- **State Management:** BLoC, Cubit, Provider, setState, Equatable
- **Architecture & Dependency Injection:** Feature-Based Architecture, Clean Architecture-inspired structure, Repository Pattern, Dependency Injection (GetIt)
- **Backend & APIs:** REST APIs, JSON serialization, Data Models, Dio, Access/Refresh Token Authentication, Firebase Authentication, Cloud Firestore, Google Sign-In, API Error Handling (dartz)
- **Local Storage:** Hive, SQLite (sqflite), SharedPreferences, flutter_secure_storage
- **UI/UX:** Figma, UI Design, Prototyping, Figma-to-Flutter Implementation, NTI UI/UX Design Certification
- **Fundamentals:** Object-Oriented Programming, Data Structures & Algorithms, Database Design
- **Tools:** Git, GitHub, Postman, VS Code, Dart DevTools, Microsoft Excel, AI-assisted development

PROJECTS (PERSONAL & TRAINING)

E-Commerce & Clothing Donation App

Sep 2026

Flutter · Dart · BLoC/Cubit · Dio · Hive · GetIt · dartz · Equatable · GoRouter · flutter_secure_storage · [GitHub](#)

- Implemented Access/Refresh Token authentication using Dio interceptors and flutter_secure_storage, including automatic token refresh and request retry.
- Built a multi-step clothing donation workflow covering item selection, organization selection, pickup details, review, and status tracking, managed with Cubit.
- Persisted confirmed donations in Hive with Pending, Accepted, and Completed states.
- Developed product browsing, search, and cart features; structured the app with feature-based, Clean Architecture-inspired principles: Repository Pattern, data models, GetIt dependency injection, dartz error handling, and Equatable.

Lo'ma — Food Discovery App

Jun 2026

Flutter · Dart · BLoC/Cubit · Dio · Hive · GoRouter · SharedPreferences · [GitHub](#)

- Integrated TheMealDB REST API with Dio for meal search, random meals, and recipe details.
- Refactored data loading from FutureBuilder to Cubit, separating business logic from presentation.
- Implemented persistent favorites using Hive and an onboarding flow with SharedPreferences and GoRouter.

To-Do App — Task Management

Feb – May 2026

Flutter · Dart · BLoC · Firebase Authentication · Cloud Firestore · Google Sign-In · [GitHub](#)

- Evolved the mobile app from a local prototype to a cloud-synced app using Firebase Authentication, Google Sign-In, and real-time Cloud Firestore CRUD operations.
- Used BLoC Events and States to separate business logic from the UI and tested data synchronization with 5 real Android users.
- Implemented category-based task organization, live task counters, and confirmation dialogs for destructive actions.

EXPERIENCE

Freelance AI-Assisted Developer — Payroll Management System

2026 · Workshop Client

- Designed and delivered a payroll management system in Excel/VBA that imports biometric attendance data and calculates salaries from hourly rates, bonuses, deductions, and advances, with payslip and summary reports.
- Worked independently from requirements gathering to client handoff, using an AI-assisted workflow (AI Fluency principles): defined the logic first, directed AI tools to generate each module, and tested it before integration.

EDUCATION

B.Sc. Business Information Systems | Higher Institute for Specific Studies

2023 – Present

Expected Jun 2027 | Relevant Coursework: Database Design, Software Engineering, Data Structures

CERTIFICATIONS & TRAINING

- **UI/UX Design Certificate** — National Telecommunication Institute (NTI), 120 hours, 2025
- **Flutter & LangChain Agent Integration (Vertex AI)** — Google Cloud Skills Boost, Hands-on Lab, 2026
- **C++ & Problem Solving, Data Structures & Algorithms, SQL** — Programming Advices, 12 courses, 2025–2026
- **AI Fluency: Framework & Foundations** — Anthropic

LANGUAGES

Arabic: Native | English: Intermediate (Reading & Writing)
