SUMMARY

Flutter Developer with 1 year of hands-on experience building 5+ personal and training mobile applications, along with a freelance payroll management system using VBA. Experienced in Flutter, BLoC/Cubit, REST APIs, Firebase, Hive, authentication, and feature-based architecture. Currently pursuing a B.Sc. in Business Information Systems.

TECHNICAL SKILLS

- **Languages:** Dart, C++, Python, SQL
- **Framework:** Flutter
- **State Management:** BLoC, Cubit, Provider, setState
- **Backend & APIs:** Firebase (Auth, Firestore, Google Sign-In), REST APIs, Dio
- **Storage:** Hive (NoSQL), SQLite (Sqflite), SharedPreferences, flutter_secure_storage
- **UI & Navigation:** Material Design, Responsive UI, GoRouter, EasyLocalization (AR/EN RTL), fl_chart
- **Tools:** Git, GitHub, Figma, Postman, VS Code, Dart DevTools

EXPERIENCE

Flutter Developer — Freelance | Payroll Management System 2026

Built a payroll management system for a workshop client using VBA & Excel, automating attendance-based salary calculations from imported biometric data, including hourly rates, bonuses, deductions, and advances. Implemented payslip and salary summary reports, managing the project end-to-end from requirements gathering and solution design to implementation, testing, and client handoff.

SELECTED PROJECTS

E-Commerce & Clothing Donation App | Flutter · BLoC/Cubit · Hive · Dio · Feature-Based Architecture · GitHub Sep 2026

Extended an E-Commerce application with product browsing, search, cart management, and a multi-step clothing donation workflow with local tracking.

- Managed the donation workflow with Cubit and persisted confirmed donations using Hive, including status tracking across Pending, Accepted, and Completed states.
- Implemented Access/Refresh Token handling with Dio interceptors and secure storage, with automatic token refresh and request retrying; structured the app using feature-based, Clean Architecture-inspired principles and GetIt.

Lo'ma — Food Discovery App | Flutter · BLoC/Cubit · Hive · GoRouter · Dio · GitHub Jun 2026

Integrated TheMealDB REST API using Dio for search, random meals, and recipe details.

- Refactored from FutureBuilder to Cubit, separating business logic from presentation.
- Implemented persistent favorites with Hive and onboarding with SharedPreferences/GoRouter.

To-Do App — Task Management | Flutter · BLoC · Firebase · Firestore · GitHub Feb – May 2026

- Evolved the app from a local prototype to a cloud-synced release with Firebase Auth, Google Sign-In, and real-time Firestore CRUD.
- Adopted BLoC Events/States to separate business logic from UI and tested synchronization with 5 real Android users.
- Implemented category-based task organization, live task counters, and destructive-action confirmation dialogs.

EDUCATION

B.Sc. Business Information Systems | Higher Institute for Specific Studies 2023 – Present

Expected Jun 2027 | Relevant: Database Design, Software Engineering, Data Structures

CERTIFICATIONS & TRAINING

- UI/UX Design — National Telecommunication Institute (NTI)
- Flutter & LangChain Agent Integration (Vertex AI) — Google Cloud Skills Boost, 2026
- C++ & Problem Solving · Data Structures & Algorithms · SQL — Programming Advices
- AI Fluency — Anthropic

LANGUAGES

Arabic — Native | English — Intermediate (Reading & Writing)
